

Workers Compensation Claims Review & Evaluation

Our predecessor specialized in Workers Compensation claims review and evaluation services. The legacy we bring forth is one of many satisfied clients who helped us to our current success. Our Workers Compensation Claims Services include review and evaluating work related claims as managed by your insurance company and their adjusters. This service requires direct access through their data portal which our client must establish for us. For each claim we review and evaluate we offer four opinions, as detailed below:

Unqualified Opinion

This opinion indicates that the claim is fair and the information accurate.

Qualified Opinion

We do not offer an Unqualified Opinion on the case in question and we will list the appropriate reasons.

Disclaimer Opinion

A Disclaimer opinion is offered when we cannot determine a definite answer. This could be due to poor record keeping, absence of evidence, or missing documentation in the file.

Adverse Opinion

This opinion indicates that the claim has been poorly managed.
